EDUCATIONAL QUALIFICATIONS

VIDYA JYOTHI INSTITUTE OF TECHNOLOGY Hyd, Bachelor of Technology, 2023 Aug, Computer Science.
Cumulative GPA: 7.99.

NARAYANA JUNIOR COLLEGE Hyd, Intermediate in M.P.C with 90.1%.

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript, TypeScript.

Programming Fundamentals: OOP (Java), Data Structures & Algorithms, Problem Solving, Complexity Analysis

Backend Development: Node.js, Elysia (Bun), Express.js, REST APIs, WebSocket, Modular Service Architecture, OCR, Data Extraction (PDF, Excel, Images), AWS Bedrock (Image-to-Text), **OOPS** (JAVA).

Cloud & Infrastructure: AWS (EC2, S3, CloudFront, Cognito, Bedrock, HealthLake, DynamoDB, Route53), IAM, Git, Postman

Front Development: Next.js, React.js, Tauri, Tailwind CSS, Chakra UI, HTML, CSS.

Database Management Systems: MongoDB, DynamoDB, MySQL, PostgreSQL, HealthLake, S3.

Work Experience

Vectorsoft | Aug 2024 - Present

Software Developer

- Helped design and implement **modular backend architecture** using Elysia (Bun), transitioning from a flat, tightly coupled structure to organized, scalable modules — enabling faster development cycles, easier onboarding, and improved long-term maintainability.
- Built a real-time WebSocket-based system** for notifications, chat, and ticketing workflows, replacing legacy polling — achieving **~50% lower latency** and **better scalability** under load.
- Engineered scalable MongoDB schemas**, replacing unstructured and redundant designs, leading to **3× faster queries** and optimized indexing for growing datasets.
- Automated manual data workflows** by integrating external APIs, reducing sync delays from minutes to seconds and eliminating human intervention.
- Developed an intelligent document processing pipeline** using bun packages + AWS Bedrock, automating data extraction from PDFs, images, and Excel files — cutting manual effort by **~70%** and improving accuracy.
- Deployed and managed cloud infrastructure** using AWS EC2, S3, CloudFront, Route53, Cognito, and Bedrock to ensure reliable, secure, and scalable application environments.
- While my primary focus has been backend and cloud, I've also contributed to frontend tasks using **Next.js**, **Tauri**, and **Tailwind CSS** for internal tools and UI integrations.
- Collaborated closely with cross-functional teams to keep development fast, clean, and scalable.
- Staying updated with emerging technologies and implementing industry best practices to enhance code efficiency, scalability, and maintainability.

Freelancer Web Developer | Self-Employed | Jan 2024 – Sep 2024

Project: openstudyai (<https://openstudyai.com/>)

- Developed the web application using React.js for the frontend and Flask for the backend.
- Utilized AWS for deploying the application, ensuring scalability and reliability.
- Collaborated closely with the client to understand requirements and provide tailored solutions.

ACHIEVEMENTS

Codekaze event

Competed in codekaze event conducted by coding ninjas, Cleared 1st and 2nd round , Got Cash reward for 3rd rank in my college in 2022, Got 1st rank in my college in 2023 and got respective reward (Criteria: college wise merit list).

Codigo Event

Competed in codigo event cleared 1st round, selected for round 2 conducted by MLR institution of technology.

Leet Code

Earned a **200-day consistency badge**; Top rating: **1554**

HackerRank

Hackerrank-5 star(gold) in (30 days of code,Java) and 3 star (silver) in (problem solving),certified in basic java and SQL.

Technical fest

Led and organized events, demonstrating leadership and collaboration skills in a technical setting.
